aditya05yt@gmail.com | +91-8521221398 | LinkedIn | GitHub

## Education

**Indian Institute of Information Technology, Sonepat** — Aug 2023 – May 2027
*B.Tech in Computer Science – CGPA: 9.27* — *Sonepat, Haryana*

**Delhi Public School, Dhanbad** — Mar 2022 – Feb 2023
*Class 12 (CBSE): 93.6%* — *Jharkhand*

**De Nobili School, Dhanbad** — Mar 2020 – Feb 2021
*Class 10 (ICSE): 96.2%* — *Jharkhand*

## Experience

**Quickkart – ECommerce Website (Freelance)** — Jul 2025 – Sep 2025
*Full Stack Developer* — *Remote*

- Spearheaded end-to-end architecture and launch of a production-ready multi-country eCommerce platform using Saleor (GraphQL) and Next.js, serving customers across Australia, UK, and US.
- Ingested 400,000+ products into the Saleor backend by scripting custom bulk CSV import pipelines, cutting catalog onboarding time by 90% and enabling scalable catalog management.
- Containerized backend services with Docker and Nginx across 2 environments, streamlining CI/CD pipelines and eliminating deployment inconsistencies.

**National Informatics Centre (NIC)** — Jun 2025 – Aug 2025
*Full Stack Developer Intern* — *New Delhi, India*

- Drove full-stack development of government web applications emphasizing secure deployment and backend reliability, serving 10,000+ users across 4 departments.
- Engineered authentication modules with input validation and role-based access control, hardening security across 5+ application modules and reducing vulnerability surface.
- Collaborated with a 3-member DevOps team to deploy the platform on secure government infrastructure, coordinating end-to-end delivery within a strict 2-month deadline.

## Technical Skills

**Frontend:** Next.js, React 19, Tailwind CSS, Bootstrap
**Backend:** Node.js, Express.js, REST APIs, GraphQL, Socket.IO
**Databases:** MySQL, MongoDB, PostgreSQL, Redis, VectorDB
**Languages:** JavaScript,TypeScript, Java, Python, HTML, CSS
**Cloud & Tools:** Docker, Nginx, AWS, Render, Vercel, Linux, Git, Postman, RAG, LLMs

## Projects

**CinePulse** [GitHub] | Next.js, React, Redis, Socket.IO, AWS SQS, PostgreSQL — Jan 2026

- Architected a high-concurrency ticket booking platform using Next.js, Redis, and Socket.IO, engineered to handle 10K+ requests/sec at peak demand – awarded at Hack The Winter Hackathon (250+ teams).
- Built a Ticketmaster-style virtual waiting room using Redis Sorted Sets to rank and queue excess users, promoting them via targeted WebSocket rooms as capacity frees up.
- Designed Redis distributed mutex locking for seat holds, reducing seat contention errors by 97% and eliminating double-booking race conditions.
- Reduced synchronous database writes by 70% with an async write-behind model using AWS SQS and background workers, and integrated Razorpay payments with idempotency-key verification for transactional correctness under load.

**IIIT Sonepat Official Website** | React, Express, Node, MongoDB — Jun 2025

- Led a 5-member developer team through full SDLC, coordinating sprints and code reviews to deliver the IIITS website for 1,000+ users across 4 college departments on schedule.
- Orchestrated a CMS curtailing manual content updates by 70%; optimized APIs and queries cutting response time by 40%; solely maintained production server at 99.9% uptime.
- Implemented JWT-based authentication with role-based access control for 4 distinct user groups, securing the application against unauthorized access.

**Wanderstay** [GitHub] | React, Node.js, Express, MongoDB, Qdrant, LLMs, RAG — May 2024

- Built a full-stack Airbnb-inspired travel platform with user authentication, property listings, reviews, and content management, handling 100+ listing records with optimized database queries.
- Developed an AI-powered review summarization feature using LLMs to generate structured summaries of common positive and negative feedback from property reviews.
- Implemented RAG-based natural-language property search using embeddings and Qdrant vector search engine to retrieve relevant listings based on location, budget, amenities, and property preferences.
- Configured AWS deployment via Docker and GitHub Actions CI/CD, reducing manual deployment effort by 80% and establishing a repeatable, reliable release pipeline.

## Achievements

- **Winner** – Zero To Deploy, Hack The Winter Hackathon (Jan 2026); **Finalist** – IIT Indore Hackathon Aug 2025.
- Solved **950+ coding problems**, earning **Knight** status on LeetCode (Rating: 1905, Top 4.3%) and **3*** on CodeChef.
- Achieved **Global Rank 187** in **CodeChef** Starters 234.
- **Technical Lead**, Hackzilla 24-hr National Hackathon (May 2025) – directed full event organization, managing logistics and a cross-functional team of participants.
- **Certifications:** Postman API Fundamentals Student Expert; Google Cloud Skill Badges (2).
